

IN THE CLAIMS

Claims 1-31 (Cancelled).

Claim 32 (New): A terminal device comprising:

a driving circuit;

a first liquid crystal layer displaying an image determined by said driving circuit;

a second liquid crystal layer on said first liquid crystal layer; and

alignment layers sandwiching said second liquid crystal layer, said alignment layers including regions displaying a fixed image, with orientations of adjacent of said regions being different.

Claim 33 (New): A terminal device according to claim 32, wherein said fixed image comprises a visible figure.

Claim 34 (New): A terminal device according to claim 32, wherein said fixed image comprises squares.

Claim 35 (New): A terminal device according to claim 32, wherein said fixed image comprises a letter.

Claim 36 (New): A terminal device according to claim 32, wherein said fixed image comprises a logo.

Claim 37 (New): A terminal device according to claim 32, wherein said fixed image comprises a color.

Claim 38 (New): A terminal device according to claim 32, wherein an image formed by said first liquid crystal layer is displayed at a front direction and said fixed image independent of said driving circuit is displayed at an oblique direction, and said fixed image is formed by said second liquid crystal layer.

Claim 39 (New): A terminal device according to claim 32, wherein a first image formed by said first liquid crystal layer is displayed at a front direction and said first image is screened by said fixed image independent of said driving circuit formed by said second liquid crystal layer at an oblique direction.
